- Follow venue and organizer instructions
- Keep your belongings secure
- Maintain a professional and respectful environment

Conference Details

About the Conference

Welcome to the AI Conference 2026. This conference brings together:

- Industry experts and researchers
- AI enthusiasts
- Students and professionals

Expect:

- Insightful talks on Artificial Intelligence
- Real-world use cases and innovations
- Interactive discussions and Q&A sessions

Participation & Networking

- Engage actively in sessions
- Participate in discussions and Q&A
- Connect with speakers and fellow attendees
- Be open to diverse ideas and perspectives

Conference Etiquette

- Keep your phone on silent mode during sessions
- Avoid interruptions during talks
- Photography is allowed unless stated otherwise
- Maintain respectful and professional behavior

Workshop: Build Your Own Smarter LLM

Requirements

- Bring your personal laptop (mandatory)
- Ensure it is fully charged and bring your charger
- Recommended: 8GB RAM or higher (lower specs are acceptable)

Pre-Installation (Important)

Please install the following before arriving:

- Visual Studio Code (Recommended extensions: Python, Jupyter, Docker)
- Git (Verify installation: git --version)
- Python (3.10 or above) - Ensure it is added to PATH
- Docker Desktop - Ensure it runs without errors

Setup & Access

- Ensure your device can connect to Wi-Fi
- Workshop resources and GitHub links will be shared during the session

Recommended Knowledge

- Basic understanding of Python
- Familiarity with command line

-> No prior AI/ML experience is required

Workshop Note

Even if you have a low-spec laptop, you can still participate.
We will provide:

- Lightweight setups
- On-site support

We Look Forward to Seeing You!

Let's learn, connect, and innovate together.
